

THE INTERNET OF THINGS... THAT MATTER

Leveraging IoT and Other Innovations for Social Impact

Today, there is a lot of hype around the Internet of Things, big data analytics, and the potential for a big payoff. But that payoff isn't always about an immediate influx of additional revenue. Applying the concept of Social Innovation is about the greater good—using technology to help build healthier, safer, and smarter societies. In fact, a recent IDG Research Services study reveals that organizations are indeed leveraging Social Innovations, paying it forward and appreciating what they receive in return.

SOCIAL INNOVATION DEFINED:

The integration of machine data (i.e., Internet of Things), analytics, I.T. solutions and industry expertise to enable organizations and agencies to address larger societal issues and trends.

WHAT COMES THROUGH LOUD AND CLEAR?

BUSINESSES SEE THE VALUE IN SOCIAL PROGRAMS AND ARE INVESTING IN PROGRAMS THAT BENEFIT SOCIETY.

80%

believe social conscience is good for business

60%

say their business decisions align with this belief

55%

have Social Innovation programs already in process

VARIOUS BUSINESS GOALS ARE DRIVING SOCIAL INNOVATION PROGRAMS ACROSS INDUSTRIES

BUT THEY HAVE ONE IMPORTANT COMMONALITY: THEY'RE LEVERAGING INNOVATIONS LIKE BIG DATA ANALYTICS AND IoT TO AMPLIFY THEIR SOCIETAL EFFORTS TO MAKE A GENUINE IMPACT.

FINANCE

Developing more cost-effective products and services

HEALTHCARE

Improving level of personalized care

TELECOMMUNICATIONS

Boosting communication capabilities and competitiveness

GOVERNMENT

Increase collaboration among departments/agencies

ORGANIZATIONS ARE MAKING SIGNIFICANT INROADS, BUT PERSISTENT I.T. CHALLENGES SLOW PROGRESS

TO OVERCOME THOSE CHALLENGES, MANY I.T. LEADERS ARE LOOKING TO PARTNERS:

WITH **VERY SPECIFIC REQUIREMENTS** THAT WILL HELP THEM MAKE BETTER DATA-DRIVEN DECISIONS—THE KINDS OF DECISIONS THAT FUEL SOCIAL PROGRAMS.
